MaLGa COLLOQUIA

February 20th	**Antonio Celani** ICTP (Italy)	The uses of memory in olfactory search
March 06th	**Peter Dayan** MPI Tubingen (Germany)	Risk, replay and rehearsal
March 20th	**Lamberto Ballan** Università di Padova (Italy)	Context-aware motion prediction and embodied social navigation
April 3rd	**Sayan Mukherjee** MPI Leipzig (Germany)	Modeling shapes and surfaces - Geometry meets machine learning
April 17th	**Nelly Pustelnik** CNRS, ENS Lyon (France)	Fast unrolled proximal algorithms to design stable and efficient neural network architectures
May 8th	**Samuli Siltanen** University of Helsinki (Finland)	Tomography: X-ray vision powered by mathematics
May 22nd	**Alexander Rakhlin** MIT (USA)	The statistical complexity of interactive decision making
June 5th	**Gitta Kutyniok** LMU München (Germany)	The world of graph neural networks: from the mystery of generalization to foundational limitations
